Red, ripe apples

They grow on trees in an orchard.

Sweet and juicy oranges.

They grow on trees in an orchard too.

I like ripe, yellow bananas.

They grow in bunches on a banana plant.

I like a bunch of juicy grapes.

They grow on grape vines.

I like cool, and wet watermelon.

They grow on vines on the ground.

I pick juicy, red strawberries.

They grow on plants along the ground too.

A pineapple is prickly and spiky.

They also grow on plants close to the ground.

Golden apricots grow ripe on the tree.

Some smooth, purple plums.
They also grow on trees.

A bowl of ripe, red cherries.

They grow on cherry trees.

We can buy them all here,

and make a delicious fruit salad.
